Amended[1] Malibu City Council
Administration and Finance Subcommittee
Special Meeting Agenda

Thursday, April 9, 2026

10:00 A.M.

City Hall – Multi-Purpose Room
23825 Stuart Ranch Road

Mayor Bruce Silverstein
Councilmember Doug Stewart

Call to Order

Roll Call

Report on Posting of the Agenda – Monday, April 6, 2026; *Amended Agenda Posted on April 6, 2026, at 7:00pm.*

Approval of Agenda

Public Comment *This is the time for the public to comment on any items not appearing on this agenda. Each public speaker shall be allowed up to three (3) minutes for comments. The Subcommittee may not discuss or act on any matter not specifically identified on this agenda, pursuant to the Ralph M. Brown Act.*

Discussion Items

1. **Presentations/Staff Updates**

   None.

2. **Old Business**

   None.

3. **New Business**

   A. Revised Job Specification for the Public Safety Director

   Recommended Action: Provide a recommendation to the City Council to approve the revisions to the job specification for the Public Safety Director.

   Staff Contact: Joseph Irvin, City Manager, Ext. 226

1. *See the addition of Discussion Items 3.B. and 3.C.*

B. *Fiscal Year 2026-27 Budget Workshop*

Recommended Action: (1) Review the five-year financial forecast and provide direction to staff to develop the proposed FY 2026-27 budget. (2) Provide direction on various strategies presented to develop a balanced budget. (3) Provide direction on updating the City's fee schedule. (4) Provide direction on priorities for the City's capital improvement program.

Staff Contact: Joseph Irvin, City Manager, Ext. 226

C. *Parking Citation Fines*

Recommended Action: 1) Review the Public Safety Commission recommendation for increasing parking citation fines; and 2) Provide a recommendation to the City Council.

Staff Contact: Joseph Irvin, City Manager, Ext. 226

Adjournment

I hereby certify under penalty of perjury, under the laws of the State of California, that the foregoing agenda was posted in accordance with the applicable legal requirements. Special meeting agendas may be amended up to 24 hours in advance of the meeting. Dated this 6th day of April 2026, at 7:00 p.m.

Administration and Finance Subcommittee Agenda Report

Administration & Finance Subcommittee Meeting 04-09-26

Item 3.A.

To: Mayor Silverstein and Councilmember Stewart

Prepared by: Susan Dueñas, Public Safety Director

Reviewed by: Christopher Smith, Assistant City Manager

Approved by: Joseph Irvin, City Manager

Date prepared: April 2, 2026 Meeting date: April 9, 2026

Subject: Revised Job Specification for the Public Safety Director

---

RECOMMENDED ACTION: Provide a recommendation to the City Council to approve the revisions to the job specification for the Public Safety Director.

FISCAL IMPACT: There is no fiscal impact from this action. The Public Safety Director position is included in the Adopted Budget for Fiscal Year 2025–2026. If approved, the revised job specification will be utilized for recruitment efforts in anticipation of the upcoming retirement of the current Public Safety Director.

DISCUSSION: The Public Safety Department is requesting approval of revisions to the Public Safety Director job specification to reflect the recent organizational restructuring of the Department. As part of this restructuring, the Code Enforcement Division has been realigned under the Public Safety Department, resulting in expanded operational responsibilities and an increased span of control for the Public Safety Director position.

These changes do not alter the fundamental purpose of the position but clarify and formalize the additional duties and leadership expectations associated with the Department's reorganization. Approval of the revised job specification will support organizational efficiency, accountability, and effective service delivery.

If the Administration and Finance Subcommittee recommend approval of the revised job description, the item will be presented to the City Council for review.

ATTACHMENT:

1. Public Safety Director Job Description

CITY OF MALIBU

PUBLIC SAFETY DIRECTOR
Class Description
Established: July 2022
Revised: April 2026

FLSA: Exempt

DEFINITION

Under administrative direction, plans, directs, manages and oversees the activities and operations of the Public Safety department including the City's preparedness and response to natural disasters and national security emergencies, wildfire risk reduction and code enforcement, managing contract services for law enforcement, homeless services, parking enforcement and animal control; fosters cooperative working relationships with intergovernmental and regulatory agencies, public and private groups, and public safety and social service agencies; provides highly responsible and complex professional assistance to City management staff and City Council in areas of expertise; and performs related duties as assigned.

SUPERVISION RECEIVED AND EXERCISED

Receives administrative direction from the City Manager. Exercises direct supervision over supervisory, professional, technical, and administrative support staff.

CLASS CHARACTERISTICS

This is a department director classification that oversees, directs, and participates in all activities of the Public Safety Department including short- and long-term planning as well as development and administration of department policies, procedures, and services. This class provides assistance to the City Manager and/or Assistant City Manager in a variety of administrative, coordinative, analytical, and liaison capacities. Successful performance of the work requires knowledge of public policy, City functions and activities, including the role of the City Council, and the ability to develop, oversee, and implement projects and programs in a variety of areas. Responsibilities include coordinating the activities of the department with those of other departments and outside agencies and managing and overseeing the complex and varied functions of the department. The incumbent is accountable for accomplishing departmental planning and operational goals and objectives, and for furthering the City's mission, goals, and objectives within general policy guidelines.

EXAMPLES OF ESSENTIAL JOB FUNCTIONS (Illustrative Only)

Management reserves the right to add, modify, change, or rescind the work assignments of different positions and to make reasonable accommodations so that qualified employees can perform the essential functions of the job.

- Assumes full management responsibility for all Public Safety Department programs, services, and activities including emergency management, fire risk reduction, homelessness, parking enforcement, and code enforcement.
- Develops, directs, and coordinates the implementation of goals, objectives, policies, procedures, and work standards for the Public Safety Department.
- Establishes, within City policy, appropriate service and staffing levels; monitors and evaluates the efficiency and effectiveness of service delivery methods and procedures; allocates resources accordingly.
- Manages and participates in the development and administration of the Department's operating budget; directs the forecast of additional funds needed for staffing, equipment, materials, and supplies; monitors and approves expenditures and implements budgetary

adjustments as necessary; administers and submits all City-related disaster claims for relief and reimbursement to applicable agencies.

- Plans, directs, and coordinates the Public Safety Department's work plan; meets with management staff to identify and resolve problems; assigns projects and programmatic areas of responsibility; reviews and evaluates work methods and procedures.
- Selects, trains, motivates, and evaluates assigned personnel; provides or coordinates staff training; works with employees to correct deficiencies; implements discipline and termination procedures.
- Administer contract services pertaining to public safety, including law enforcement, animal care and control, parking enforcement and homeless services, ensure that services provided are in accordance with contract requirements, budgets, and related laws, ordinances, and regulations.
- Coordinates and manages the City's emergency management functions including analyzing critical issues; identifying potential hazard to health and safety; training and advising staff in roles related to emergency operations; and ensuring the City's disaster preparedness plan is maintained in accordance with State law.
- Oversees the City's emergency alert/notification system, including posting notifications on the City's social media outlets, website, and other communication platforms.
- Oversees the City's public safety volunteer programs.
- Responds to the most complex and sensitive inquiries and complaints regarding public safety issues and concerns; directs staff and coordinates with other City departments and outside agencies to address public safety issues.
- Provides professional staff support to the Public Safety Commission, other committees, and task forces, as necessary.
- Coordinates with the City's Media Information Office for proper dissemination of public safety information
- Collaborate with agency partners to develop innovative solutions and initiatives in public safety and emergency management administration.
- Ensures that the City's Emergency Operations Center (EOC) is in a constant state of readiness and that all EOC systems are operational and up to date. Maintains ability to activate EOC at all levels of incidents and planned events.
- Ensures that the City's EOC Incident Management Team maintains a consistent training program and is in a constant state of readiness to respond.
- Conducts a variety of organizational studies, investigations, and operational studies; recommends modifications to department programs, policies, and procedures as appropriate.
- Monitor and analyze current and proposed legislation, regulations, policy, and programs that impact public safety programming or grant opportunities; develop position reports and letters for the City Manager and City Council as needed; and assists in the development of new, or updates to, municipal codes and fines for the purpose of addressing public safety issues.
- Represents the Public Safety Department to other City departments, police and fire agencies, elected officials, and other agencies and organizations; coordinates department activities with those of other departments and outside agencies and organizations.
- Directs and participates in the preparation, review, and presentation of reports; provides recommendations to the City Manager, City Council, various boards as required; manages special projects as assigned by the City Manager.
- Receives, investigates, and responds to the most difficult and sensitive complaints, inquiries, and requests for services and takes necessary action to resolve.
- Maintains and directs the maintenance of working and official departmental files.
- Ensures staff observe and comply with all City and mandated safety rules, regulations, and protocols.
- Performs related duties as required.

QUALIFICATIONS

Education and Experience:
Any combination of training and experience that would provide the required knowledge, skills and abilities is qualifying. A typical way to obtain the required qualifications would be:

Education:
Equivalent to a bachelor's degree from an accredited college or university with major coursework in public administration, criminal justice, emergency management, public safety, or related field.

Experience:
Eight (8) years of increasingly responsible public safety, emergency management, enforcement operations, and/or fire services professional work experience, including three (3) years of administrative and management experience. Emergency Operations Center or Incident Command experience.

License/Certifications:
- Possession of a valid California Driver's License and a satisfactory driving record, to be maintained throughout employment.
- Completion of Standardized Emergency Management System training, FEMA ICS 100 & 200 and IS 700 & 800 courses required by the Department of Homeland Security within a specified amount of time.

Knowledge of:
- Organization and management practices as applied to the development, analysis, and evaluation of programs, policies, and operational needs of the Public Safety Department.
- Principles and practices of employee supervision, including work planning, assignment review and evaluation, discipline, and the training of staff in work procedures.
- Principles and practices of leadership.
- Administrative principles, practices, and methods including goal setting, program development, implementation and evaluation, policy and procedure development, quality control, and work standards.
- General principles of risk management related to the functions of the assigned area.
- Public safety principles and practices, including law enforcement, fire services, code enforcement, disaster planning and emergency management response.
- Standardized Emergency Management System, the National Incident Management System, Incident Command System and State and County emergency preparedness requirements.
- Operational practices and procedures of first responder agencies and special teams.
- Principles of contract procurement and administration.
- Principles and practices of budget development and administration.
- Technical, legal, financial, and public relations problems associated with the management of Public Safety programs.
- Grant application and administration.
- Applicable federal, state, and local laws, codes, and regulations as well as industry standards and best practices pertinent to the assigned area of responsibility.
- City and mandated safety rules, regulations, and protocols
- Techniques for providing a high level of customer service, by effectively dealing with the public, vendors, contractors, and City staff.

- The structure and content of the English language, including the meaning and spelling of words, rules of composition, and grammar.
- Modern equipment and communication tools used for business functions and program, project, and task coordination, including computers and software programs relevant to work performed.

Ability to:

- Select and supervise staff, provide training and development opportunities, ensure work is performed effectively, and evaluate performance in an objective and positive manner.
- Develop and implement goals, objectives, practices, policies, procedures, and work standards.
- Provide administrative, management, and professional leadership for the Public Safety Department.
- Plan, organize, administer, coordinate, review, and evaluate a comprehensive public safety and emergency preparedness and response program.
- Prepare and administer large and complex budgets; allocate limited resources in a cost-effective manner.
- Conduct effective negotiations with governmental agencies, contractors, vendors, and various business, professional, regulatory, and legislative organizations.
- Analyze problems, identify alternative solutions, project consequences of proposed actions and implement recommendations in support of goals.
- Make accurate arithmetic, financial and statistical computations.
- Direct the maintenance of and maintain accurate records and files.
- Understand, interpret, and apply all pertinent laws, codes, regulations, policies and procedures, and standards relevant to work performed.
- Effectively represent the department and the City in meetings with governmental agencies, public safety organizations, community groups, and various business, professional, and regulatory organizations, and in meetings with individuals.
- Prepare clear and concise reports, correspondence, documentation, and other written materials.
- Use tact, initiative, prudence, and independent judgment within general policy, procedural, and legal guidelines.
- Work effectively with City volunteers and outside volunteer organizations.
- Independently organize work, set priorities, meet critical deadlines, and follow-up on assignments.
- Communicate clearly and concisely, both orally and in writing, using appropriate English grammar and syntax.
- Establish, maintain, and foster positive and effective working relationships with those contacted in the course of work.
- Effectively use computer systems, software applications relevant to work performed, and modern business equipment to perform a variety of work tasks.

SUPPLEMENTAL INFORMATION

PHYSICAL DEMANDS

When assigned to an office environment, must possess mobility to work in a standard office setting and use standard office equipment, including a computer; vision to read printed materials and a computer screen; and hearing and speech to communicate in person and over the telephone; ability to stand and walk between work areas may be required. Finger dexterity is needed to access, enter, and retrieve data using a computer keyboard or calculator and to operate

standard office equipment. Positions in this classification occasionally bend, stoop, kneel, reach, push, and pull drawers open and closed to retrieve and file information.
When assigned to field work, must possess mobility to work in changing site conditions; possess the strength, stamina, and mobility to perform light physical work; to sit, stand, and walk on level, uneven, or slippery surfaces; to reach, twist, turn, kneel, and bend,; and to operate a motor vehicle and visit various City sites; vision to inspect site conditions and work in progress. The job involves fieldwork requiring frequent walking in operational areas to identify problems or hazards, with exposure to hazardous materials in some site locations. Employees must possess the ability to lift, carry, push, and pull materials and objects averaging a weight of 20 pounds, or heavier weights, in all cases with the use of proper equipment and/or assistance from other staff.

ENVIRONMENTAL CONDITIONS

Employees work in an office environment with moderate noise levels, controlled temperature conditions, and no direct exposure to hazardous physical substances. Employees also work in the field and are exposed to loud noise levels, cold and hot temperatures, inclement weather conditions, road hazards, vibration, chemicals, mechanical and/or electrical hazards, and hazardous physical substances and fumes. Employees may interact with upset staff and/or public and private representatives in interpreting and enforcing departmental policies and procedures.

DISASTER SERVICE WORKER

In accordance with California Government Code Section 3100, City of Malibu employees are considered disaster service workers and may be asked to respond in the event of an emergency or natural disaster.

Administration and Finance Subcommittee Agenda Report

Administration & Finance Subcommittee Meeting 04-09-26

Item 3.B.

To: Mayor Silverstein and Councilmember Stewart

Prepared by: Renée Neermann, Financial Controller
Christopher Smith, Assistant City Manager

Approved by: Joseph D. Irvin, City Manager

Date prepared: April 3, 2026 Meeting date: April 9, 2026

Subject: Fiscal Year 2026-27 Budget Workshop

RECOMMENDED ACTION: (1) Review the five-year financial forecast and provide direction to staff to develop the proposed FY 2026-27 budget. (2)Provide direction on various strategies presented to develop a balanced budget. (3)Provide direction on updating the City's fee schedule. (4) Provide direction on priorities for the City's capital improvement program.

FISCAL IMPACT: There is no fiscal impact associated with the recommended action. Direction provided by Council at its April 15, 2026 budget workshop will be used to develop the FY 2026-27 Proposed Budget.

DISCUSSION:

Introduction

The City of Malibu has prided itself on its excellent fiscal position, sustained by solid property, sales, transient occupancy, and other taxes, fees and fines, and investment revenues. This has enabled the City to maintain an AAA credit rating and build a healthy General Fund reserve, which was essential to supporting the City's recovery from recent fires. The impacts of those fires drove the City to dedicate 22% of the City's adopted FY 2025-26 budget to disaster recovery, even as certain revenue streams were negatively impacted.

Now, over a year out, the City must take stock of its fiscal position and establish a long-term strategy to ensure financial resilience, prepare to invest in desired community amenities, and be ready for the next disaster.

To do this, staff have developed a five-year forecast to strategically plan and prioritize Malibu's budget. This effort found that while Malibu's revenue streams are anticipated to recover, the growth of existing expenditures, if left unchanged, would outpace revenues through the forecast period and beyond. This is driven largely by:

- Federal government reimbursements are severely delayed and staff expect that the City will not see major portions of the reimbursement until FY 2029-30
- Sales and Use Tax and Transient Occupancy Tax revenues continue to be impacted following the fires
- Costs associated with employee retirement, healthcare, and insurance outpace the growth rate of revenues
- Property tax revenues, the City's largest revenue stream, are experiencing modest growth now as fire-related reassessments and appeals offset assessed value increases
- Costs for many areas of City business, including construction and maintenance, legal services, insurance, technology and other areas have been impacted by inflation, tariffs and industry changes

Therefore, staff are in the process of identifying a series of measures to balance the City's expenditure plan with anticipated revenues to mitigate impacts to the General Fund balance as well as create better alignment of City operations and services. These will be presented at the City Council Administration and Finance Subcommittee (A&F) meeting as well as the Council's budget workshop on April 15, 2026.

The drop in General Fund reserves to nearly 50% of the City's adopted budget this fiscal year is driving staff to propose an operating budget that greatly reduced the City's reliance on General Fund reserves by looking at rightsizing department budgets, reducing the City's staff count by defunding vacant positions, realigning City operations, proposing an update to City fees, and engaging Council in a discussion on various policies to generate additional revenues and prioritize capital investments.

This report outlines where the City's fund balance is anticipated to be at the end of this fiscal year, covers the five-year forecast, and seeks direction on priorities and strategies to guide staff in developing the proposed budget, which will be presented at the May 26, 2026 Council meeting.

The outlook for Malibu remains very strong. This community's careful preservation of its rural character and coastline make Malibu one of the most desirable destinations to live and visit. And with strategic thinking, the City can continue to provide high quality services, support our community's recovery, focus on adding key community amenities, and begin preparing the City to be ready for the next disaster.

City's General Fund Balance: Assessing the Budget Impacts of the Fires

The Franklin and Palisades fires destroyed or damaged 770 structures in Malibu, displacing many residents and businesses. The Palisades fire in particular destroyed homes and businesses from hilltop down to the ocean, decimating an extended portion of eastern Malibu. Due to the complexity of the cleanup and the damage in the area, the Pacific Coast Highway was then closed to Malibu from Santa Monica and Los Angeles for another five months, further delaying the City's economic recovery.

The City immediately embarked on a major rebuild initiative, dedicating $34.7 million in FY 2024-25 and FY 2025-26 to supporting the recovery from the Woolsey, Franklin, and Palisades fires- shoring up Malibu's infrastructure and providing dedicated services to impacted residents and businesses. Funding these services is a critical part of the City's role in supporting the community through a disaster, and is done so in anticipation of some reimbursement of funds from the State and federal governments.

The Fiscal Year 2026-27 budget presents the opportunity to move into the next phase of the disaster response, continuing to dedicate services to help residents rebuild, supporting the local economy to ensure there are amenities and services to meet the needs of Malibu families and residents, prioritizing community needs, and assessing the long-term impacts of the City revenue streams on City operations and reserves.

This comes at a time when the City has received limited reimbursements from the federal government for its qualifying disaster expenditures and the Department of

Homeland Security remains without funding, further delaying City efforts to seek these reimbursements. Complicating the fiscal situation, staff have looked at the projected impacts to City tax streams for the next five years and the level of homes and businesses impacted by fire. The number of residents displaced and that will be displaced for some time, combined with concerns about a return of inflation and an economic slowdown mean Malibu's recovery is anticipated to take longer than it did following previous disasters.

The City's residents are key to supporting the local economy year-round as visitor rates fluctuate throughout the year. To support the rebuilding and reoccupying of homes, the City has actively engaged displaced residents through community meetings, the opening of the Rebuild Center, and the waiving of fees for those rebuilding homes of a similar size to those destroyed by the fire. Through these efforts, it is anticipated that Malibu will see a steady return of those able to reoccupy homes over the next five years.

Meanwhile, the fires have impacted the City's revenues and financial position in a myriad of ways. Key tax revenue streams are down or have grown at lower rates than previously anticipated, including property tax, sales, and transient occupancy tax. Particularly impacted is transient occupancy tax from short-term rentals, many of which were destroyed by the Palisades fire. In addition to these revenue streams, the City had to rely on reserves to balance the budget, reducing the amount of funding in its investment portfolio, thus reducing the amount of revenue the City generates from investments. This revenue stream will recover as the City rebuilds its reserves.

As a result of the fires and the City's committed response, the City's General Fund has gone from $83.8 million at the end of FY 2024-25 to a projected amount of $54.9 million at the end of this fiscal year.

Financial Forecast and Budget

Given the unique circumstances Malibu finds itself in following the series of disasters, staff undertook to develop a five-year forecast to help illustrate projections of key revenue streams and expenditures with the goal of serving the community's most important needs while preserving the City's fiscal position. Throughout this section, the report illustrates the five-year financial forecast as well as the various factors affecting Malibu that were used to inform the forecast.

The challenges that Malibu is facing are unique and their influence on the budget far exceed national, State and even regional economic factors. However, there is merit in looking at the overall economic picture to gauge headwinds that might further impact Malibu in its recovery. Recent forecasts, such as the UCLA Anderson Spring 2026 Forecast for the US and California, issued on March 4, 2026, have already been eclipsed by the continuing war in Iran and the significant uncertainty that it is bringing into the economic and geopolitical landscape. While the Anderson forecast projected stronger growth due to the end (at least in the near-term) of tariff hikes, new income tax cuts included in the One Big Beautiful Bill Act (OBBBA), AI capital investment and lower interest rates, the Organization for Economic Cooperation and Development (OECD) has recently forecast that inflation will rise to 4.2% in 2026, up from the Federal Reserve's most recent forecast of 2.7%.

Tourism, a very important economic driver for this region, is down overall due to the current administration's restrictions on international visitors. According to the World Travel and Tourism Council, while tourism grew worldwide last year, the United States, recording a 6% drop, was the only major destination showing a decrease in foreign visitors. The effects of the government shutdown on airport security lines and anticipated higher airfares due to spikes in gas prices because of the war will further erode travel. While the region is hosting the FIFA World Cup, economists are not expecting that international visitors for this and other 2026 events will make up for the declines. When looking at the impact of the LA28 Olympics, Anderson economists anticipate increases in hotel and short-term rental rates (Paris rates showed increases of 141% and 44%, respectively) and in occupancy (Paris showing a 20% increase in hotels and 58% increase in booked nights for short-term rentals).

While these global influences are important, staff dedicated most of their analysis to local trends and data points, engaging with City tax advisors to review projects for sales and property taxes. Staff also reviewed actuals for all City tax and fee revenues. On the expenditure side, staff considered anticipated rates of inflation, the impacts of tariffs and global unrest as well as growing healthcare, insurance and pension costs.

Staff combined all of these factors – the impacts of the fire, the outlook on the local economy, performance of City revenues, and increases in costs for operations to develop the three scenarios within the five-year forecast. Staff seeks Council's

direction as to which forecast scenario staff should base the FY 2026-27 proposed budget – current trajectory, 7% reductions or 10% reductions.

Forecast-Revenues

The forecast anticipates that most City revenue streams will recover and provide a solid foundation for the City. There are two notable exceptions – Transient Occupancy Tax will remain below pre-fire levels because of the large number of short-term rentals no longer available, and investment income will also remain below pre-fire levels until the City is able to replenish its reserves.

Overall, revenues were adjusted by an anticipated inflation rate of 2-3%, which includes some variances. Staff anticipates that reimbursements from the federal government will remain modest until FY 2029-30 when larger reimbursements will start to be seen. It should be noted that, while Malibu diligently works to comply with federal regulations, the timing of this funding stream remains very uncertain.

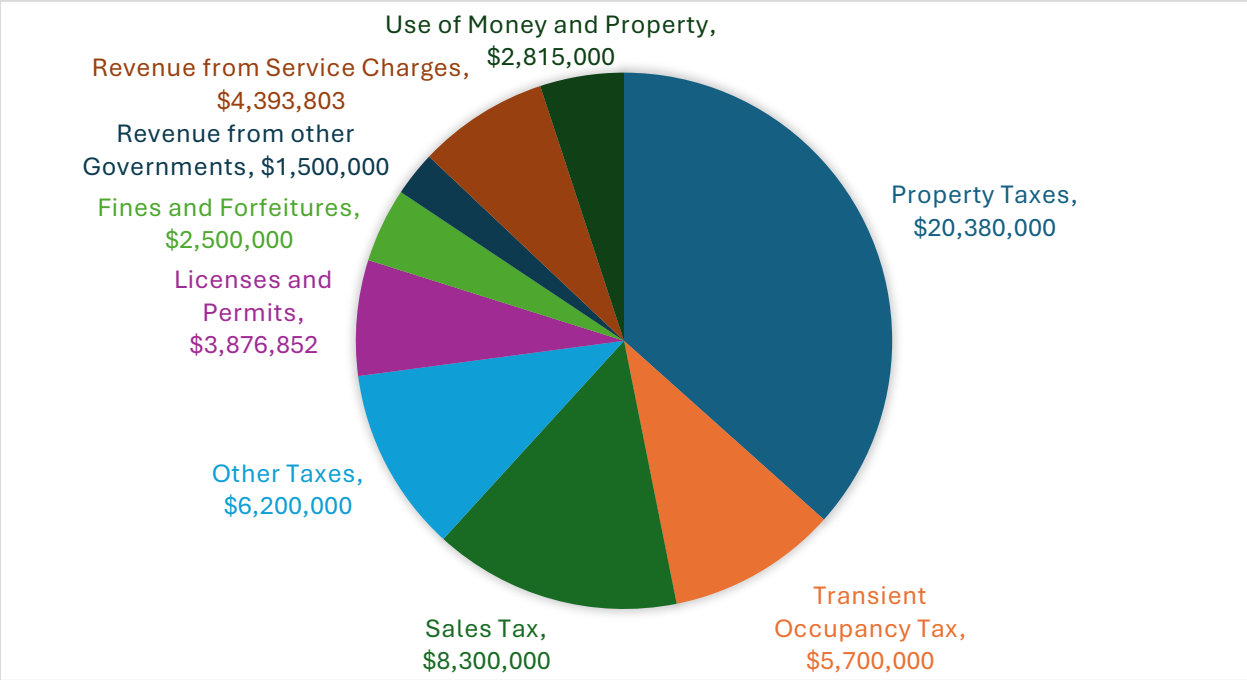

Table 1: City Revenue Streams

Tax	**Outlook**
Property Tax	At the FY 2025-26 mid-year budget, staff recommended increasing the revenue estimate for property taxes by $1 million, to $20.4 million. Staff anticipate revenues will come in around that estimate this fiscal year. Staff also anticipate some level of growth in property tax revenues in FY 2026-27 due to the relatively large number of properties for sale followed by growth of approximately 2-4% annually. It should be noted that properties destroyed or damaged by the fire had their assessments reduced immediately after the fire. Several other property owners requested a reduction in their property taxes due to proximity to the fire and other issues. Any of those reductions in tax will fully show in the FY 2026-27 actual revenues.
Sales Tax	Sales tax revenues appear on target to meet the reduced estimate included in the mid-year budget of $8.2 million. Sales tax growth is anticipated to experience modest growth throughout the forecast period because of the significant number of residents displaced, vacation rentals destroyed, and businesses damaged by the Palisades Fire.

Transient Occupancy Tax (hotels)	Revenue from hotel stays is estimated around the budgeted $2.5 million in this fiscal year. The forecast includes a recovery of these revenues to $3.5 million in the next fiscal year followed by modest growth of 3% as local hotels will be able to charge premium rates with reduced competition from short-term rentals during a series of major regional events, including the Superbowl and the 2028 Olympics.
Transient Occupancy Tax (short-term rentals)	Revenues from short-term rentals were reduced as part of the mid-year budget to $3.2 million. Staff are concerned about whether the City will realize this reduced revenue figure this fiscal year and whether revenues from these rentals will remain down during the forecast period because of the relatively large number of short-term rentals destroyed or otherwise removed from the rental market following the fire. Nevertheless, staff anticipates some recovery of these revenues and projects revenues of $3.5 million in FY 2026-27 followed by modest growth of 2-3%.
Other Taxes	Many of the City's smaller revenue streams have held steady over recent years, including franchise fees. Staff do expect a small uptick in Utility Users Tax revenues due to the anticipated increase in water rates and increases in energy prices.
Investments	Investment revenue is expected to come in around $2.8 million. This level of revenue is expected through the forecast period as the General Fund reserves available for investing remain relatively flat. Should Council opt to leverage more of the General Fund reserves, this revenue project will be revised downward.
Federal Reimbursements and Revenue from Other Governments	Staff continues to track disaster-related expenditures eligible for FEMA reimbursement. However, Malibu, along with many other jurisdictions, is experiencing unprecedented delays in receiving reimbursements. The current shutdown of the Department of Homeland Security further complicates this process. The forecast anticipates a slow flow of reimbursements ($1.5 million per year) in the first three years, followed by larger reimbursements of $10 million per year in Years 4 and 5 of the forecast. It should be noted that this is an uncertain funding stream of one-time payments.
City Fees	City fees are doing very well and are anticipated to come in over budget at $8.2 million for City services and fees,

	including building and planning fees. Staff have built in the anticipated fee schedule increase recommended through a fee study conducted in FY 2024-25 as well as a catch up of previous years' cost of living increases, increasing these revenues to $10 million in FY 2026-27 and then growing by 3% through the remainder of the forecast period. Revenue from the City's speed camera pilot is not accounted for in the forecast because those revenues must be earmarked for traffic safety enhancement projects and used within three years of receipt. Staff continue to evaluate how these revenues can offset eligible expenditures and advance eligible unfunded capital projects. These revenues will be incorporated as the plan for using these funds becomes better defined.
City Fines	Parking fine revenue is expected to grow from $2.5 million to $3 million as a result of additional enforcement teams being deployed by the City's parking enforcement contractor. These revenues are anticipated to remain flat through the forecast period; however, additional revenue may be realized if changes to the City fine schedule, recommended by the Public Safety Commission, are approved by Council.

Figure 2: FY 2025-26 Anticipated City Revenues

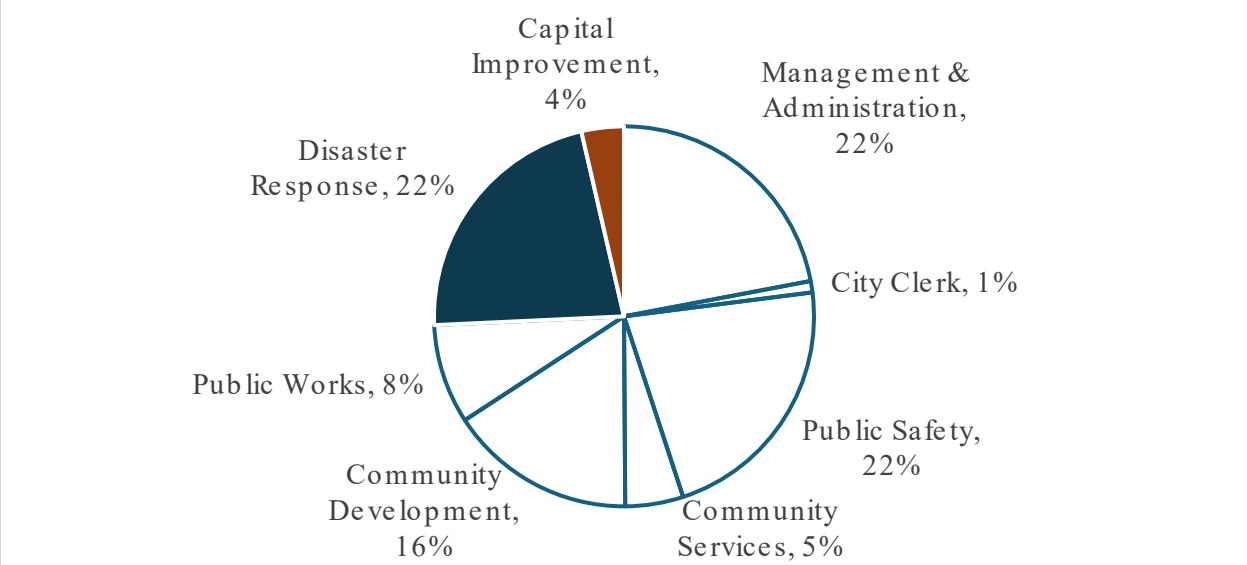

Forecast – Expenditures

The City's General Fund expenditures fall into three primary categories: City operations, disaster recovery, and capital improvement. As shown in the figure below, the City dedicated 22% of the FY 2025-26 budget to disaster recovery and 4% to capital improvement. The remaining 74% was dedicated to City department operations. Within those, staffing represents approximately one-third of the budget, including salaries, benefits, and retirement, which is relatively modest when compared with many cities. However, the City workforce has grown by 22 positions since FY 2022-23, meaningfully increasing the amount of the budget obligated to staffing costs.

Because Malibu contracts for many services, the operating budget also includes sizable contracts for Sheriff, CHP enforcement, legal services, waste disposal, parking enforcement, street maintenance, landscape maintenance, and for the City yards, among other services. These contracts have all steadily grown in recent years due to the impacts of inflation, tariffs, and a competitive labor market. Likewise, the cost for technology and software licensing has also seen a marked increase in recent years. While inflation remains around 3%, there are risk factors from global unrest and increasing oil prices that are pointing to an uptick in inflation rates, which would add further pressure to City expenditures.

Figure 3: FY 2025-26 City expenditures by department, capital improvement and disaster response

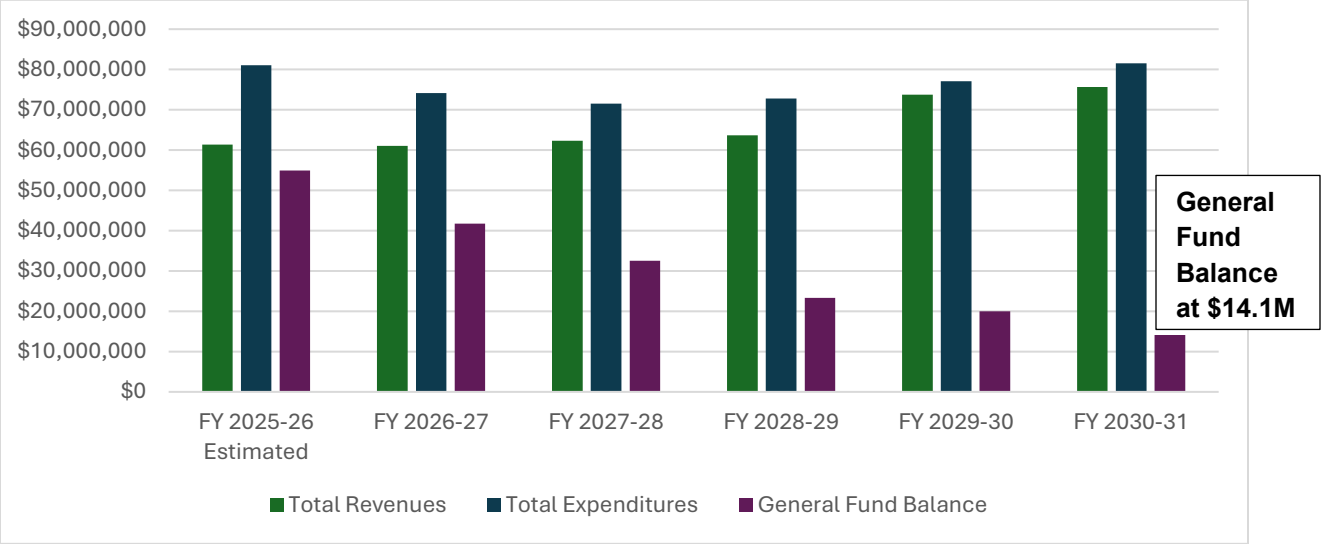

Staff anticipate that expenditures from disaster recovery will be approximately $5.4 million in FY 2026-27 and will wind down over two years. Other factors driving costs are supporting employee salaries, healthcare and retirement, which grows between 8-10%, outpacing normal inflation. Other expenditures are anticipated to grow at 3-4%, which is the current average rate of inflation. Taken together, the forecast anticipates operating expenditures will grow at a rate of about 6%. The forecast also assumes a limited General Fund-funded capital improvement program, planning $2 million per year for future projects. The City will continue to advance other projects funded by non-General Fund sources.

Forecast – Making No Changes

When all is factored together, while revenues are anticipated to recover, expenditures outpace projected revenues. This is depicted in the chart below where revenues (green bar) steadily grow but not at the same rate as expenditures (blue bar). This then requires the City to rely on reserves to balance the budget, thereby depleting the General Fund to only $14.1 million in reserves, 17.3% of the projected budget, at the end of the forecast. If there are further complications in receiving the $24.5 million in FEMA reimbursements expected in the forecast, it would worsen the outlook for the General Fund in the forecast and require significant restructuring of the operating budgets to keep the General Fund solvent.

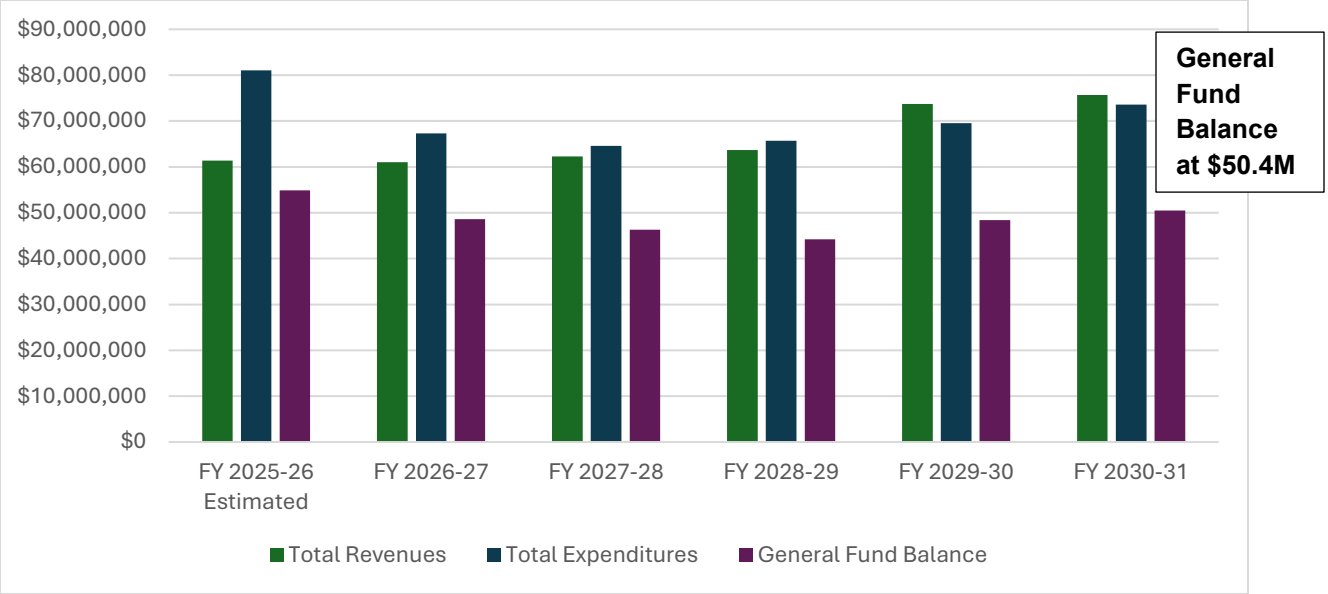

Chart: Forecast with no Changes to City Expenditures

Forecast – 10% Reductions

Concerned with the prospects for the General Fund and guided by the City's financial policy to maintain General Fund reserves at 50% of the City's approved budget, staff analyzed how the City could improve its financial outlook. First staff looked at revenues and found that, for the most part, they are expected to recover from the impacts of the fire except where noted above. The challenge concerns expenditures. To achieve a forecast that maintains a General Fund balance where it stands today requires a 10% reduction in department operating budgets, the equivalent of $6.8 million across all departments and disaster recovery as well as maintaining a more limited capital improvement program. If the City can reduce expenditures to this level, the City will only have to rely on reserves to support the limited capital improvement program in the near years and may be in a better position to fund major community amenities starting in FY 2029-30 with the increase in federal disaster reimbursements. This scenario leaves the General Fund with $50.4 million in reserves or 68.5% of the projected budget in FY 2030-31.

Chart: Forecast with 10% Reductions to City Expenditures

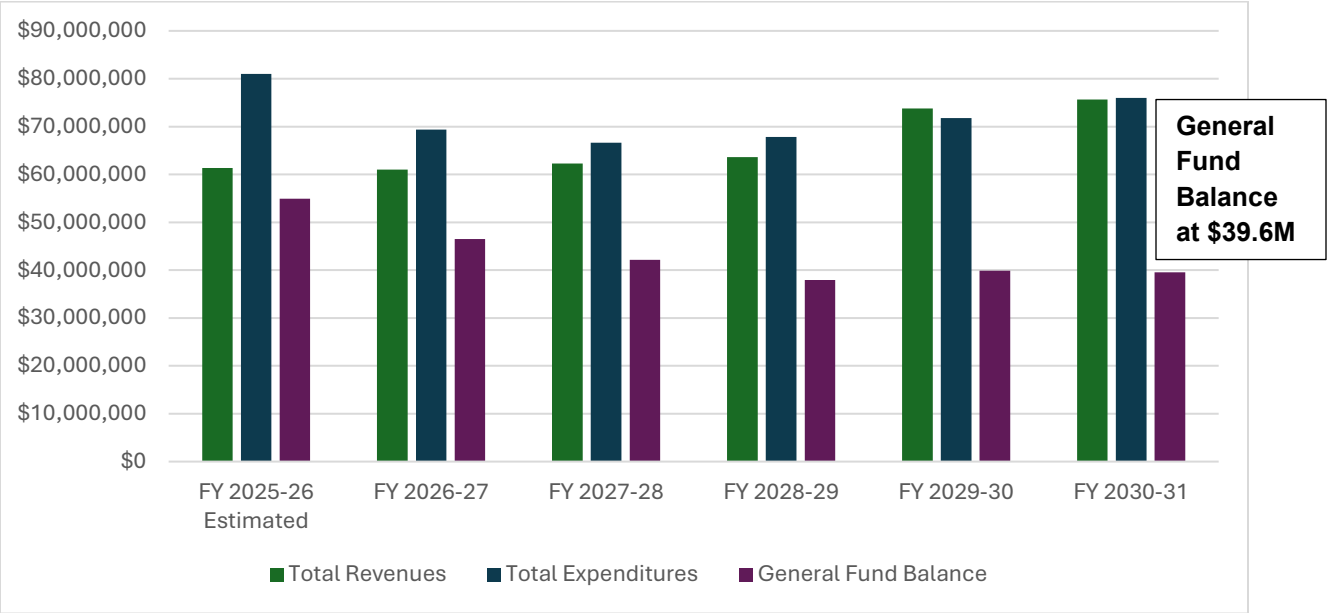

Forecast – 7% Reductions

Staff also examined a forecast that preserves the 50% fund balance per City policy. To achieve this scenario requires a 7% reduction in operating budgets along with a reduction in the capital program to $2 million per year. This equates to a $4.8 million reduction in the City's operating budget for departments and disaster

recovery. However, this scenario continues to draw on General Fund reserves to fund the City budget while assuming the City receives $24.5 million in reimbursements over the forecast period. This scenario projects the General Fund with $39.6 million in reserves or 52% of the projected budget.

Chart: Forecast with 7% Reductions to City Expenditures

Preparing for the FY 2026-27 Budget: Organizational Realignment and Budget Rightsizing and Capital Priorities

To support the City in balancing its budget, staff have undertaken a comprehensive review of City revenues and expenditures to identify ways to bring down costs while preserving treasured City services and programs. The result is a recommended restructuring of the Community Development, Public Safety and Public Works departments as well as budget efficiencies being identified by staff through review of vacant positions, city contracts, and other expenditures. Staff will be prepared to review those measures at the A&F subcommittee meeting on April 9, 2026. Please note that no layoffs or modifications to employee benefits were undertaken as part of this exercise.

<u>Realignment of City Operations</u>

To better align City services and operations and better balance operational responsibilities, staff recommend changes to reporting and teams within the

Community Development, Public Safety, and Public Works Departments. These changes include moving:

- Code Enforcement to Public Safety – Code Enforcement is a quasi-safety function and is housed with Public Safety teams in many cities. Aligning these functions allows the Code Enforcement team to work more closely with safety partners such as the Sheriff, homeless prevention and fire departments as well as better support parking enforcement.
- Environmental Programs to Public Works – Environmental Programs touches on many City public works functions, including water quality, urban and storm water runoff, as well as making city buildings and operations more sustainable. Baker Tilly recommended this realignment as part of its 2023 review of the Community Development department.
- Two Analysts from the City Manager's Office to Public Safety and Public Works – As part of evolving the Fire Liaison program and preparing the Public Safety department to undertake major initiatives for safety and emergency management planning, staff recommend moving one Sr. Management Analyst from the City Manager's Office to Public Safety. Likewise, as Public Works builds out its Administrative team to handle more grants and manage the disaster recovery reimbursement process, staff recommend moving one Management Analyst from the City Manager's Office to Public Works. These changes allow staff to better utilize existing positions without the need to create additional positions.

Budget Efficiencies

To achieve reductions in spending, staff are undertaking a review of previous year's actuals, reviewing vacant positions, and prioritizing City operations. The City anticipates expenditures to total $81 million in FY 2025-26, including operating, disaster recovery and capital improvement. Staff have identified the need to reduce expenditures to between $67-$69 million to remain within the City's fiscal policies during the forecast period. One-time capital projects associated with fire recovery funded in FY 2025-26 and that do not require new funding next fiscal year close the gap by $8.8 million, leaving a remaining gap of $3.2-$5.2 million.

To close the gap, departments have been asked to identify ways to reduce their budgets by 10%. Staff will present a list of recommendations at the A&F meeting and full Council budget workshop. These reductions involve further right-sizing of budgets, a review of vacant positions, and review of all city operations.

Capital Program Priorities

The Capital Improvement Program (CIP) includes a portfolio of projects supporting the City's infrastructure, safety, disaster recovery and community amenities. The roster of projects are funded through a mix of General Fund monies as well as dedicated funding from special revenue sources. Staff will present a full update of the Capital Program with the presentation of the draft budget in May but staff seeks Council's direction on project priorities.

CIP projects programmed in FY 2026-27 include safety improvements, storm drain improvements/repair, stormwater treatment and disaster recovery projects. The majority of these projects are fully funded by Measure M, Measure W and disaster recovery funding sources. Examples of these projects include the PCH Improvements – Trancas Canyon Right Turn Lane, PCH Improvements at Big Rock Drive, Las Flores and Rambla Pacifico Intersections, and Kanan Dume Biofilter.

The Point Dume Resurfacing Project, Phase I is the annual asphalt resurfacing of several streets within the Point Dume neighborhood. The project is funded by Proposition C, Measure M Local Return, Measure R Local Return, RMRA, STPL and the General Fund. The total project estimate is $1,232,000 with $200,000 from the General Fund. The Encinal Canyon 60-inch Storm Drain Improvements Project was identified in the 2024 Storm Drain Master Plan. The total project estimate is $1,000,000 funded from the General Fund.

Partially funded projects include CCWTF Phase 2 and PCH Wastewater Project. They will be funded with assessment districts which will be formed for each. The Heathcliff Community Center, Temporary Sports Facility, Malibu Canyon Road Safety Improvements, the design and construction of the Snack Shack and several other projects are currently unfunded.

At the budget workshop staff seeks direction on deferring two projects and setting aside funding for one unfunded community priority project.

Deferrals

- Defer replacement of Land Management System – upon evaluation of organizational readiness for a project of this scale, staff need additional time to assess requirements and likely undertake a new competitive bid process.
- Evaluate delay of permanent installation of retaining wall at Latigo Canyon Road until appeal for FEMA funding reimbursement is resolved and funding

approved. Staff will return with a final recommendation as part of the FY 2026-27 proposed budget in May.

Community Priority

- Dedicate $3.25 million of the General Fund savings from this fiscal year to dedicate to the design and construction of the Snack Shack.

Economic Recovery:
Supporting Local Businesses for Malibu Families and Residents

In the wake of the fire response, in April of 2025, the City conducted a business survey to gather insights on how businesses were impacted by the Palisades Fire. Based on the results of this survey, at its April 28, 2025 meeting, the City Council approved the creation of a $300,000 Small Business Micro Stabilization Grant Program to assist local businesses impacted by the fires, winter storms, and prolonged PCH closure.

To continue long-term recovery efforts, the City engaged Sunstone Cities to evaluate the impacts of the fires on Malibu's economy, engage with local businesses and residents, gather data on Malibu's business composition and industry clusters employment to develop an Economic Recovery Strategy. Through these efforts Sunstone has identified a number of unique aspects to Malibu's economy, including the disproportionately large number of home-based businesses in the area.

Prolonged PCH closures, intermittent power outages, disruptive infrastructure repairs, delays in emergency disaster reimbursements, and the slow return of workers and visitors have resulted in fatigue among residents and small business owners. There is a prevalent fear among residents and small business owners that outside investors and commercial interests may take ownership of Malibu properties and change the nature and culture of the community.

Therefore, Sunstone Cities conducted a structured outreach process that built on the initial business survey to include combined stakeholder interviews, expanded survey and geographical data, and economic analysis. The process began with interviews of all City Councilmembers and the Interim City Manager, who also provided guidance on additional stakeholders to include, ensuring key voices were not overlooked. Building on this, interviews were conducted with institutional

partners and community organizations, alongside participation in a local business roundtable to better understand post-fire challenges, ongoing concerns, and the City's current efforts.

In parallel, the Business Recovery & Resilience Survey was distributed via a Google Form, shared through the City's newsletter, boots on the ground outreach, and other channels to expand outreach and validate themes emerging from interviews. Fact-finding has also been supported through collaboration with Dr. Robert Kleinhenz, Sunstone Cities' economist consultant, including analysis of American Community Survey (ACS) data and custom datasets from the Employment Development Department to better understand local economic conditions. Together, these efforts provide a well-rounded understanding of Malibu's economic landscape and ensure the strategy is grounded in both data and direct community input.

Based on this research and interviews, residents and small business owners are looking for strong City leadership to preserve the unique rural community and culture of Malibu. Sunstone Cities is still gathering and preparing an Economic Recovery Strategy based on the research and outreach efforts. Therefore, the Economic Recovery Strategy, in the next phase of work, will develop recommendations that are tailored, actionable, and effective for Malibu to:

- Take control of its future
- Preserve Malibu for residents and families
- Invest in economic recovery to prevent budget cuts and preserve essential services
- Support and uplift legacy businesses

The plan will include recommendations of actions the City can take to encourage people to patronize local businesses, look at ways to streamline the opening of businesses, and ways to draw desired services and amenities to Malibu. The plan will also include recommendations on available funding through various government agencies and other partnerships to support the recovery.

Supporting City Revenues

Given the long-term impacts of existing revenue streams and the community's desire to add amenities and activate community lands, staff have identified areas to help support revenue generation for Council consideration. These revenues

could also be utilized to rebuild Malibu's reserves more quickly to help support the next disaster response.

Updating Existing Revenues

- *Fee Rate Update.* In FY 2024-25, the City undertook a comprehensive fee schedule review. In May 2025, the Administration and Finance Subcommittee reviewed these findings, and again reviewed them prior to this workshop. Fees have not kept up with the increased costs for maintaining facilities and staffing various services. Therefore, staff seeks Council's direction to bring forward an updated fee rate schedule as part of the budget. The complete proposed fee schedule is attached.
- *Parking Fines*. Similar to City fees, staff and the Public Safety Commission recommend an adjustment of the City's parking citation rates to help discourage illegal parking and improve enforcement. Staff seeks Council's direction to include an updated parking fine schedule as part of the proposed budget. This is presented as a separate agenda item.

New Revenue Opportunities

In addition to these fee and fine updates, staff would like Council to provide direction on two other potential revenue opportunities.

- *Parking Rates.* Currently, Malibu does not charge for any public parking. With millions of visitors traveling within Malibu each year, this is a means by which to generate much needed funding to maintain the local infrastructure. Advancements in parking technologies make implementation of paying for parking a more convenient and visually cleaner experience, via smartphones or centralized kiosks. There are various options for parking rates, all of which would need to be studied to evaluate revenue opportunities. Council also would be able to tailor parking rates and times. If Council so directs, staff could study parking fees and return with more information later in FY 2026-27. Any implementation of parking rates would need Coastal Commission approval and require the implementation of parking collection equipment. Therefore, it is unlikely the City would generate new parking revenues until FY 2027-28.

- *Development Impact Fees*. Another area for fee generation is the implementation of Development Impact Fees. These fees are one-time charges levied by a local government on new construction projects to fund public infrastructure, such as roads, parks, and schools. Malibu is one of the few cities that does not include these fees for developers. Most neighboring cities generate considerable revenue and both Thousand Oaks and Beverly Hills are considering revamping their development fee structures. If Council directs, staff could further study the opportunities for revenue generation through development impact fees and return later in FY 2026-27 with information.

Update on the Strategic Plan

On November 11, 2025, Council adopted a three-year strategic plan with seven strategic goals. Staff have made advancements in several areas of the strategic plan and are using the plan to shape their department workplans, which will be presented to Council at the public budget hearing on May 26, 2026. This update is provided, in part, to help inform any direction Council wishes to provide to staff on priorities to guide staff as they develop departmental work plans.

Since adoption, the City has made meaningful progress in advancing near-term recovery efforts while establishing a foundation for longer-term initiatives. Notably, the City has adopted key rebuilding ordinances, implemented permit waivers, and streamlined development processes to accelerate recovery for fire-impacted properties, reducing barriers for residents seeking to rebuild. Staff have also advanced a comprehensive economic recovery strategy, positioning the City for implementation in 2026. Tangible progress is evident in community-facing projects, including the near-completion and early opening of the new Skate Park, which has already served residents and enhanced recreational opportunities.

While longer-term efforts related to infrastructure resilience, digital modernization, and organizational development remain in early stages, staff have identified priorities and are beginning to align resources and planning efforts accordingly.

Next Steps

The Council will meet on April 15, 2026 for its budget workshop where these policy questions will be put before them. Based on their direction, staff will craft the proposed FY 2026-27 budget, which will include the proposed revenues and expenditures for the General Fund as well as the City's enterprise funds. Council will then have the opportunity to provide additional input at the public budget hearing on May 26, 2026 before the final proposed budget is presented to Council for adoption on June 29, 2026. Staff will continue to refine budget projections and the five-year forecast as additional information becomes available throughout this process.

Planning Consultant Services	Each	Actual Cost			Actual Cost	n/a	Actual Cost	Pass Through

[1] Administrative plan review fee includes 2 incomplete letters; 1 site visit; 1 final inspection; coastal development permit exemption; "green stamp" and "red stamp."

[2] The City shall bill hourly for services performed by in-house staff. For services performed by outside consultants/service providers, the City shall bill for actual cost incurred, plus 30%.

[3] Biology fees, bill hourly after base fee is expended. Site inspections are not included with fee.

[4] Fee set by Office of Los Angeles County Recorder.

[5] Coastal development permit fee includes 3 incomplete letters; 2 site visits, not including final inspection; 2 Planning Commission hearings; and "green stamp." If required, lot merger processing is included in fee.

[6] This fee applies when development or work has been completed without the required permits or planning approvals. It covers planning staff time to review the existing work and determine compliance with City regulations when a minor planning review is required (e.g., Over-the-Counter application).

[7] This fee applies when development or work has been completed without the required permits or planning approvals. It covers planning staff time to review the existing work and determine compliance with City regulations when APRs, CDPs, CUPs, etc. is required to remedy the violation.

[8] This fee shall be billed on hourly basis based on the actual staff

[9] Fee set by California Department of Fish and Wildlife.

[10] Fee covers direct cost to prepare report and/or study plus Planning staff time to manage report and/or study only. All entitlement fees and City Specialist fees to be paid separately.

[11] City Specialist fees apply.

[12] Should a CDP application exceed three submittals, this fee shall apply for each additional submittal.

[13] Should an APR application exceed two submittals, this fee shall apply for each additional submittal.

[14] Ordinance No. 468

[15] Consultant fee charged separately.

[16] For service requests not identified in this Schedule of Fees, the Planning Director or his/her designee shall determine the appropriate fee based on the prevailing hourly rate for staff time involved in the service or activity. Additionally, the City will pass-through to the applicant any discrete costs incurred from the use of outside service providers required to process the specific application or service, plus 30%.

[1] Resolution No. 91-67.

Project	Status	Funded	Target Completion Date	Update Notes
Goal 1. Support Community Rebuilding and Long-Term Recovery				
Objective 1.1: Accelerate and simplify the rebuilding of $1.6 billion in destroyed properties.				
Long Term Recovery Plan	Active	Yes		The City has made substantial progress across all components of this initiative, with a strong emphasis on transparency, accessibility, and community trust. A community-led recovery vision is actively being implemented through consistent public meetings, workshops, and direct engagement at the Rebuild Center, ensuring residents remain central to the recovery process. This effort is further supported by expanded digital outreach—including recorded meetings, informational videos, and social media—allowing the community to access information on demand.

Focused Code Amendments	Active	Yes	Completed	Ordinance No. 524 was adopted in March 2025 and certified by the Coastal Commission. In addition, staff has participated in inter-agency meetings to advance the City's goals, which have resulted in numerous Executive Orders. All guidelines are posted on MalibuRebuilds.org. Also, the City has created a process for Los Angeles County Building Code Section 110.2.3.6 to provide relief for owners who wish to sell their property. Technicial Advisory Meetings: 24 Transparency and Public Review: 14 Community Meetings 14 Website Updates: Creation of Official Rebuilding Policies and Guidelines Update to Local Ordinances (Ordinance No. 524) - Adopted March 12, 2025 Sign Permitting and TUP Amendments (Ordinance No. 526U) Addition of the Initial On-Site Consultation Program Environmental Health Requirements for OWTS Repairs Environmental Health Review Policy of New OWTS Foundation Feasibility Report for Fire-Damaged Structures Geologic/Geotechnical and Coastal Engineering Guidelines for Fire Rebuild Initial On-Site Consultation – Fire Rebuild Guidelines LCP & Zoning Code Interpretations MEP Requirements for Fire Rebuilds Post-Fire Residential Building Plan Check Temporary Housing Installation Permit Requirements
Fire Rebuild Waivers	Active	Yes	Completed	On July 14, 2025, the City Council adopted Resolution 25-29. City staff has created an application process, webpage, and tracking module which tracks all Palisades fees, refunds, waivers, and refund liability.

Objective 1.2: Modernize development policies and procedures citywide to support resilient community development.				
Development Policy and Procedure Updates	Active	Yes		1. The City is currently in the process of adopting the General Plan Safety Element. 2. Streamlining - City staff continues to streamline the development process, including updates to the Development Portal, adding Archistar, incorporating one-stop rapid permits, direct application uploads, joint planning -building plan check process for specific types of ADUs, joint planning-bulding plan check submittals (in progress), implemented streamlined Rebuilding Development Applications and ADU rebuild applications, and eliminating plan review for some types of applications (solar permits, generators, tenant improvements, water heaters, seismic shuffoff/valve, HVACs, etc.).
Goal 2. Drive Economic Recovery and Restore Lost Revenue				
Objective 2.1: Recover lost sales, hotel, and transaction tax revenue to predisaster levels to restore the city's ability to deliver high quality services.				
Economic Recovery Plan	Active/on track	Yes	Jun-26	The City engaged Sunstone Cities to conduct outreach, research, and to prepare an economic recovery strategy. Work completed includes business/community survey, economic trends and analysis report, draft recovery strategies, and case studies/partnerships and funding sources draft. Next steps through June include gathering City Council and community input to finalize an economic recovery plan.
Economic Recovery Outreach Campaign	Active/on track	No		
Business Recovery Grants	Active/on track	Yes		
Goal 3: Advance Infrastructure Resilience				
Objective 3.1: Develop and fund a comprehensive Infrastructure Resilience Plan				
Sewer Plan	Active/on track	Yes	2030	Received proposal for Assessment Engineering Services on 4/3/26. Proposals for design services are due 4/23/26. Funding will be provided by Assessment District.
Water Tanks and Fire Flow Upgrades	Not started	No		

Coastal Resiliency Infrastructure	Not started	No		
Microgrid Plan	Not started	No		
Comprehensive Infrastructure Resilience Financing Plan	Not Started	No		
Telecommunications Plan	Not started	No		
Goal 4: Improve Public Safety				
Objective 4.1: Reduce injury and fatal collisions on PCH				
PCH Safety	Initiated	Yes	6/30/2026	Contract with speed camera vendor scheduled for April 13. Preparing for required public education campaign and securing a hearing officer.
Objective 4.2: Increase wildfire resiliency				
Wildfire mitigation	Initiated	Yes	6/30/2027	(7) more neighborhoods are in process for becoming Firewise. We submitted a FEMA Hazard Mitigation Grant request for a home hardening and fuel reduction program. Updating the Wildfire Protection Plan is on hold pending budget discussions.
Emergency Evaluation	Initiated	Yes	6/30/2026	Evacuation Plan update is nearly complete. Still exploring alert and warning options, including the mobile sirens that we will be acquiring soon. Exploring additional alert and warning systems and implementing Subdivision Review recommendations will be in the FY 26/27 workplan.
Objective 4.3: Reduce Homeless Encampments				
Homeless Encampments	Initiated	Yes	6/30/2026	Measure A funds are not available; however, we are working to secure some rapid rehousing funds to offset costs for interim shelter beds at Turning Point, or hotel vouchers. The first objective listed is an ongoing activity without an end date.
Goal 5: Modernize City Operations with new Digial Ecosystem				
Objective 5.1: Streamline city processes, permitting, payments and project management				
Upgrade Equipment	Initiated	Yes		A/V Equipment contract will be at Council on 4/13/26. Work is anticipated to take place over summer of 2026.

Online Permitting	Initiated	No		Staff began initial meetings to identify strategies for online permitting. Staff began evaluation of a Land Management System. This was put on hold to accomodate the proposed budget.
Enterprise Resource System	Initiated	No		
Interdepartmental Project Management Platform	Not Started	No		
Goal 6: Foster a high-performance workplace culture				
Objective 6.1: Enhance employee morale, retention and innovation				
New Personnel	Active/on track	Yes		
Employee Recognition Program	Initiated	No		
Training and Development	Not Started	No		
Goal 7: Explore new opportunities for educational.cultural and recreational establishments				
Objective 7.1: Deliver high quality public services and spaces for education, recreation and culture				
Snack Shack	Initiated	No	Early 2028	City Council reviewed the preliminary design of the Snack Shack on March 9, 2026. Due to the expanded scope and complexity of the project, the name was updated to the Malibu Bluffs Park Snack Shack and Park Enhancement Project. The design includes upgrades to storage areas, new restroom facilities, ADA accessibility improvements, additional pedestrian pathways, and new paving. Staff are working with City engineers to complete the Coastal Development Permit application in 2026, while also identifying funding sources and establishing a mechanism for accepting donations to support the project.
Skate Park	Active/on track	Yes	May-26	The Skate Park is in the final phase of construction. Park was opened to the public on Saturdays and Sundays beginning February 14, 2026. The park currently averages 100 patrons per weekend. Staff are coordinating with community leaders, the Youth Commission, and local businesses to plan the grand opening celebration.

Community Lands Project	Active/on track	No	In November 2025, the City contracted with Fredrick Fisher & Partners to work on the design concept for a Multigenerational Recreation Center at the Heathercliff Property. On January 26, 2026, Council received an update on the Community Lands Project and directed staff to the Public Parks and Property Ad Hoc Committee to bring back a plan for temporary fields on the Ioki parcel, explore options for a native plant nursery with the SaMo Fund, and continue working on the Recreation Center on the Heathercliff Property. The Fisher team has presented the design and costs for the temporary fields on the Ioki parcel and the Multigenerational Center on Heathercliff to the Ad Hoc Committee. The Ad Hoc Committee will meet with staff to discuss funding and priorities in Spring 2026. Concepts of the Heathercliff site have been completed, a concept and cost estimate for the Ioki temporary fields have been developed.
Malibu Unified School District	Initiated	Yes	Funding requested as part of the 2026-27 budget for a "Malibu is for Families" campaign. Campaign to be conducted by Cruz Strategies (School Separation Consultant). Further
Malibu Equestrian Center	Initiated	No	Since 2024, the Parks and Recreation Commission has reviewed the seasonal use of the Malibu Equestrian Park and determined that equestrian activity remains low, averaging approximately 3–5 users per week. Staff are working with Trancas Riders and Ropers (TR&R) to develop a schedule of equestrian programs and events planned this year. Additionally, equestrian instructors have contacted the Department to propose a variety of programs anticipated to begin in Fall 2026. Maintenance costs associated with the park will be discussed as part of the 2026–27 Budget process.

Administration and Finance Subcommittee Agenda Report

To: Mayor Silverstein and Councilmember Stewart

Prepared by: Luis Flores, Senior Management Analyst

Reviewed by: Susan Dueñas, Public Safety Director

Approved by: Joseph Irvin, City Manager

Date prepared: March 30, 2026 Meeting date: April 9, 2026

Subject: Parking Citation Fines

RECOMMENDED ACTION: 1) Review the Public Safety Commission recommendation for increasing parking citation fines; and 2) Provide a recommendation to the City Council.

FISCAL IMPACT: In Fiscal Year 2024-25, the City received $1.6 million in revenue from parking citations and is on track to net $2.5 million in Fiscal Year 2025-26. Parking citation revenue is anticipated to increase by approximately $295,383 per year as a result of this action.

WORK PLAN: This item supports the City's 2025 Strategic Plan Goal 4. Improve Public Safety.

DISCUSSION: At the March 4, 2026, Regular Public Safety Commission Meeting, the Public Safety Commission (Commission) performed a review of the parking citation fine schedule. At that meeting, the Commission voted to recommend that the City Council increase the fines for multiple violations. The recommended increases fall into three categories: 1) fix-it tickets, 2) consistency with similar codes, and 3) violations that are criminal in nature.

The following table illustrates the projected revenue increase that would occur as a result of the proposed citation fine increases:

Citation	Previous Fine Amount	New Fine Amount	Projected Revenue Increase
Fix-It Tickets			
CVC 5200 (No Front/Rear License Plate)	$58	$75	$351,713
CVC 5201(A)(Plates Clearly Visible)	$58	$75	TBD
CVC 5201 (C&D)(License Plate Covered)	$38	$75	$10,332
CVC 5201 (Position of Plates)	$58	$75	$27,217
Consistency With Similar Codes			
LACO 15.64.180 (Parking Against Red Curb)	$41	$73	TBD
LACO 15.64.370 (Parking By Fire Hydrant)	$98	$150	TBD
CVC 4457 (Mutilated/Illegal License Plate)	$58	$75	$13,226
Criminal In Nature			
CVC 4464 (Altered License Plate)	$38	$250	$49,184
CVC 4462 (B)(Incorrect Registration on Car)	$58	$100	$6,300

Total (Gross): $468,862
Total (Net): $295,383

The projected revenue increase was calculated using citation statistics from January 1, 2025 through December 31, 2025. The net revenue reflects the average amount received by the City after ticket processing fees are subtracted. It is important to note that enforcement rates for the year were lower than usual due to the impacts of the Palisades Fire from January through March 2025, as well as ongoing construction that significantly limits parking in eastern Malibu.

Fix-It Tickets

Fix-it tickets, or mechanical violations, allow for a citation amount to be substantially reduced upon receiving proof of correction signed by a law enforcement agency. However, only about 5% of people who receive these types of violations in the City currently make corrections. An increase in the fines may serve to better motivate people to make the necessary corrections and ensure compliance with the California Vehicle Code, ultimately increasing deterrence of violations. Additionally, new safety enhancements have been implemented or are in the process of being implemented, such as the installation of Automated License Plate Reader (ALPR) cameras throughout the City and the upcoming speed camera program along PCH. Improved compliance with license plate vehicle codes will support the success of the new safety enhancements.

Consistency With Similar Codes

There are a number of Los Angeles County and California Vehicle Codes that are equivalent to one another; however, the fine amounts vary per City. To ensure consistency in pricing between equivalent codes, the Commission recommended increases to LACO 15.64.180, LACO 15.64.370, and CVC 4457 accordingly.

In addition, parking enforcement officers and Volunteers on Patrol (VOPs) currently use 15.20.070 LACO (Obey Signs / Curbs / Markings) whenever a vehicle parks against a red curb (LACO 15.64.180). If the recommended fine increase is approved, the City will enforce LACO 15.64.180 for red curb violations which will allow the City to collect public safety data on vehicles parking alongside a red curb. This will help the City to target this specific violation for additional increases or other deterrence measures if needed in the future.

Violations That Are Criminal In Nature

The Los Angeles County Sheriff's Department (LASD) Malibu Liaison Sergeant pointed out that violations for "altered license plate" (CVC 4464) and "incorrect registration" are considered criminal in nature and did not appear to have fines that sufficiently deter the behavior. Violations for CVC 4464 and CVC 4462 suggest that the driver of the vehicle intentionally modified their license plate or vehicle registration to avoid detection by ALPR cameras, avoid tolls, and ultimately avoid identification by law enforcement. The violations have the highest suggested fine increases as a result.

Staff recommends that the Administrative and Finance Subcommittee consider the proposed fine adjustments and provide a recommendation to the City Council to adopt the fines as stated or adjust them as appropriate.
